# Installation Guide for GTS NX License

## Step 1

- launch the setup.exe file in the installation folder and follow the instructions
- At the end of the procedure, When a prompt asks the Type of license, choose “Web license”.

## Step 2

-Go on midas Website  
members.midasuser.com to create a  
MUSS account ID and password.

-Direct Link:

<https://members.midasuser.com/en/signup/step1>

### Step 3

- Open the software GTS NX
- Open the Menu Tools > Options

### Step 4

- 1- Open the Menu General > License
- 2- Select “Web Authentication”
- 3- Enter you MUSS ID/Password
- 4- Enter the license PKID into the fields “Pre/Post Key” and “Solver Key”
- 5- Click on Options

**Important:** For the web license, the Pre/Post key and the Solver Key are identical, so please copy the same PKID in the 2 fields.

## Step 5

- 1- Select the right Product ID corresponding to your web license
- 2- Verify that the Options you have are activated
- 3- Click on Update Button
- 4- Click on OK

## **Step 6**

- 1- Open the Menu Options > Analysis/Results
- 2- Select the right number of processors corresponding to your PC
- 3- You can choose to enable also the GPU Calculation if your graphic card has more than 0.5 Teraflops in double precision\*

\* Card of Type Nvidia Tesla or better is recommended for significant calculation speed improvement (around 5~20 times faster calculation depending on the model.)
